

TEAMSCALL

INTRODUCTION: Here I wanted to show that the team I worked with I tend to use whatsapp and especially teams to work in a professional setting especially in after school hours. I made sure to initiate it.

THE CALL: As a team member I made sure to put my input in after class activities to work on the group project as well such as organizing and participating in team calls. Sometimes it wouldn't be easy working with the groups on weekends since the availability varied but structuring the time and planning ahead worked. We discussed mostly on whatsapp but I also made sure to use teams with the group for a professional feel to it. It even worked accordingly.

CONCLUSION: Using teams I would make the conclusion that this tool helped productivity of the group go higher since it is a more professional and seriously taken platform compared to whatsapp or instagram etc. We discussed more of our plans better and what to give our priorities too for the project since this happened right after our client presentation where

we had the feedback that we were behind. So as small as a contribution this app has I still wanted to mention that without it it wouldve been uneasy to manage with the group.

REFLECTION: Looking back at this I do want to use teams as a communication tool when it comes to group calls or more collaborative work on a professional level. Whatsapp works and is efficient but I noticed everyone take the professional level up a notch. So this will continue for professional work.
