

The heuristic evaluation assignment ft dirk.

Heuristic	Evaluation to Heuristic (tnah)	After group consultation (mateo & gabe)	
Visibility	Contact page: <ul style="list-style-type: none"> - You can see the icons social media that is visible enough to tell that they have certain social media accounts, and you can follow them from there. 	- 👍	
Mapping	<ul style="list-style-type: none"> - The image at homepage shows a version of freedom and (unknown) adventure. And having the text of "go abroad, exchange ideas and learn new things". (self intrepertation) 	<ul style="list-style-type: none"> - The social media icons on contact page - The world (ex. Homepage) is a metaphor for traveling worldwide. 	-
Control and freedom	<ul style="list-style-type: none"> - We have learn more buttons that indicate you to the next step in case the user is interested to learn more about the certain topic mentioned. 	- 👍	-
Consistency and standards	Exchange modules page : <ul style="list-style-type: none"> - The red banner on this page is not on the same area as that of the homepage. - The title of the page is in italic and centered instead of 	- 👍	

	<p>non-italic and on the left of the page.</p> <ul style="list-style-type: none"> - In the background shapes, there's a mix of shapes. Other pages have spacing and there's a usage of blue too instead of just red and yellow. 		
Error prevention	<ul style="list-style-type: none"> - Could be an option if there's more time in our hands. Currently no error prevention. 	- 👍	-
	<ul style="list-style-type: none"> - Information is easy to discover by clicking on the learn more buttons (ex. Homepage) - There's no proper recognition on every button: the "click to learn more" button does not describe what page you go to. (ex. our institutions) 	- 👍	-
Flexibility	<ul style="list-style-type: none"> - Easy and flexible to use for the users destined for the use of these webpages. 	- 👍	-
Minimalism	<ul style="list-style-type: none"> - There's a clear and smooth structure in the pages; not too much going on; all fonts are consistent. 	- 👍	-
Error recovery	<ul style="list-style-type: none"> - Could be an option if there's more time in our hands. Currently no error 	- 👍	-

	recovery. There's currently no error recovery.		
Help and documentation	<ul style="list-style-type: none"> - There's a git - At the contact page: there's direct in-place hints (where to fill what) in the questions form. 	- 👍	-

Future use (Tina) :

The way I can use this is like keep the heuristics next to me and using it like It's a checklist. I can see it from the eyes of the user and try to see if there's something that does/doesn't go smoothly.

Reflection (Tina):

It really helped to use this assignment as a checklist and deep dive into things that are/could be improved or even added. There was a lot of inconsistency especially with margins, borders and fonts but without the help of this evaluation we wouldn't be able to differentiate most of the structure.
