

USAGE OF TRELLO

I've been using Trello to make sure I stay consistent with my documentation process per learning outcome. Sometimes when I don't have everything documented I tend to add the main title in the Trello so whenever I check my Trello it is a reminder to work on that documentation or learning outcome.

I also use Trello for group projects together with my team. Here you can see that work is in progress and different tasks are set up for different dates/weeks. I have helped keeping the Trello up to date and reminded the team to check on the following tasks.

Reflection: looking back at how I've been using Trello I don't think there's anything I wouldn't do since this app is helpful and very useful especially when it comes to group

communication and planning. I can only say that the more I use it the more I grow to love it and use it for personal things such as my own portfolio. It is easy to work with and something I'd use more frequently in the future.
